

FIRST LIVE ADVANCED COURSE IN
AESTHETIC FACIAL SURGERY

The only way to learn surgery is to do it. For this reason, we have formulated a unique hands-on practical course.

This innovative course will give you **the exclusive interactive opportunity to enhance your know-how in the operating theater.**

Outside academic schemes, the course will transmit our experience to the participants.

Surgery will be integrated with extensive daily lectures, clinical case analysis and videos.

We will explain and reveal our surgical techniques with complete transparency.
